## Summary

Architected and spearheaded the development of high-scale web applications, optimizing data retrieval speeds by 40% through .NET 9 and Redis caching. Orchestrated secure API lifecycles and background task management using Hangfire, while deploying high-performance React 19 frontends. Proven track record of bridging complex server-side logic with Swiss-style UI design to deliver seamless, scalable digital experiences that prioritize both technical efficiency and aesthetic precision.

## Education

Yalova University Yalova, Türkiye  
Computer Engineering

## Experience

Tersan Yalova, Türkiye  
Stajyer  
Engineered scalable .NET 9 Web APIs using Layered Architecture and Clean Code principles, optimizing system performance through Redis caching and Hangfire background jobs. Integrated AWS S3 for media storage and Azure Key Vault for secure secret management, while ensuring high software reliability with xUnit integration tests and managing containerized environments via Docker.

## Projects

Dekodem  
Accelerated a corporate construction platform's performance by 50% using React and Firebase, delivering a high-performance minimalist UI with a premium industrial aesthetic. Optimized asset delivery via Cloudinary, resulting in sub-2-second page loads, and executed technical SEO strategies to achieve a 95+ Lighthouse score. Engineered a fluid, responsive user experience by integrating real-time cloud data management, significantly increasing digital brand authority.
